An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Poe on 6-20-2006.

The application has been amended as follows:

Claim 18, line 1, deleted "of" and inserted --extending from the head to a distal end, the shank comprising a--;

line 2-4, deleted "extending from the head ... distal end with said bolt" and inserted --adjacent the head and a round cross section extending from the non-round cross section to the distal end, the round cross section includes a thread at the distal end and, said shank--;

Claim 20, line 4, deleted "of" and inserted --extending from the head to a distal end, the shank comprising a--;

line 2-4, deleted "extending from the head ... distal end with said bolt" and inserted --adjacent the head and a round cross section extending from the non-round cross section to the distal end, the round cross section includes a thread at the distal end and, said shank--;

line 9, changed "a retainer" to --said retainer--;

line 10, changed "a retainer of" to --said retainer having--

line 11-12, deleted "at the junction ... section of the bolt" and inserted --
therein--;

line 13, changed "a rail member with" to --said rail member including--
and; changed "of" to --having--;

line 14, changed "portion" to --section--;

line 15, deleted "when" and changed "portion" to --section--;

line 17, after the first occurrence of "said bolt" inserted --such that--;

Claim 23, line 4, deleted "of" and inserted --extending from the head to a distal
end, the shank comprising a--;

line 2-4, deleted "extending from the head ... distal end with said bolt"
and inserted --adjacent the head and a round cross section extending from the square
cross section to the distal end, the round cross section includes a thread at the distal
end and, said shank--;

line 8, deleted "added" and; changed "portion" to --cross section--;

line 8-9, changed "threaded portion" to --cross section--;

line 9, changed "a retainer" to --said retainer,--;

line 9-10, deleted "thought the cross-hole ... said carriage bolt, with";

line 10, changed "having" to --including--;

line 11, changed "of" to --having a-- and; changed "square portion" to --
square cross section--;

line 12, after "bolt" inserted --to receive the square cross section of the carriage bolt--.

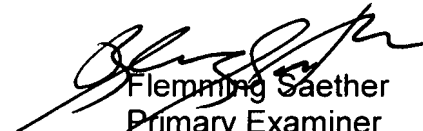

The following is an examiner's statement of reasons for allowance: the prior art does not disclose a bolt having a cross hole at the junction a non round and round section. Applicant further discusses the importance of the hole location to the overall invention thus it is not simply a design choice.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Flemming Saether whose telephone number is 571-272-7071. The examiner can normally be reached on Monday through Friday.
